01 PROFILE

Full-stack engineer with 8+ years building and teaching web and mobile development. Most recently built Resellify's cross-platform app from the ground up in React Native and Expo, taking it from architecture and AWS integration through to release on the App Store and Google Play. Before that, built e-commerce on Next.js and Shopify: 6 consumer-brand storefronts at AskPhill and a reusable headless commerce framework at QDivision. Leading 8 Ironhack bootcamp cohorts added what teams look for in a senior hire: explaining technical decisions clearly, giving useful code feedback and mentoring other developers.

02 EXPERIENCE

Mobile & Full-Stack Developer

2024 – Apr 2026

Resellify • Freelance

- Built Resellify's cross-platform mobile app **from the ground up** in React Native and Expo and took it to production, with substantial ownership of the app's architecture and implementation.
- Developed the core product flows: 2FA/OTP authentication, user profiles and settings, item management, and listing and resale workflows.
- Integrated the app with **AWS Cognito, AppSync/GraphQL, DynamoDB, S3 and Lambda**, working alongside the engineer who set up the initial AWS environment.
- Ran much of the release lifecycle across **EAS, TestFlight/App Store Connect and Google Play**, resolving store review feedback, build issues and platform-specific production problems.
- Worked with developers, product stakeholders and a UX designer through beta testing, production releases and ongoing iteration. The engagement started with rebuilding functionality around Resellify's existing embeddable React resale widget.

React Native Expo TypeScript AWS Cognito AppSync/GraphQL DynamoDB S3 Lambda EAS

Full-Stack E-commerce Developer

2024

QDivision • Freelance

- Built a **reusable headless e-commerce framework** on Next.js, React, Shopify APIs and Storyblok, covering customer authentication, product and collection retrieval, cart management and checkout-related flows.
- Implemented and maintained Shopify storefront features and integrations across multiple client projects, in both greenfield and existing codebases.
- Worked across implementation, debugging, testing, refactoring and deployment, adapting to each client's requirements and architecture.

Next.js React Shopify APIs Storyblok Liquid TypeScript

Lead Web Development Instructor

Jul 2022 – Apr 2025

Ironhack

- Led **8 full-time and part-time bootcamp cohorts** of up to 29 students (typically 15 to 20), owning the pace, structure and technical delivery of each course.
- Taught the full-stack MERN curriculum through lectures and live coding: JavaScript, React, Node.js, Express, MongoDB, authentication, REST APIs, Git/GitHub and deployment.
- Mentored students through individual and group projects, monitored technical progress with Teaching Assistants and Program Managers, and ran end-of-course technical assessments.
- Kept the material current as the ecosystem moved (Vite, Render, Netlify), maintained public GitHub examples, and automated Slack notifications for Zoom recordings with Zapier.

JavaScript React Node.js Express MongoDB REST APIs

Front-End Developer

Jul 2021 - Jul 2022

AskPhill · Amsterdam

- Developed and maintained **6 e-commerce storefronts** for consumer brands on Next.js, Shopify, Contentful and Liquid, across headless and Shopify-based architectures.
- Built commerce features including product reviews, back-in-stock notifications, and pricing and promotional components, integrating Klaviyo and Stamped.
- Restructured Contentful data fetching to stay within **API rate limits**, splitting large queries into batched requests and recombining the results in the application.
- Implemented and troubleshoot production integrations including Google Tag Manager and Shopify APIs, and contributed to Vercel deployments and production delivery.

Next.js · React · Shopify · Liquid · Contentful · Vercel · Klaviyo · Google Tag Manager

03 ADDITIONAL EXPERIENCE

Full-Stack Developer · Social Wire · Freelance

Apr - May 2023

Extended an existing community platform with threaded forum replies, user mentions, role-based tagging, profile and account features, and notification workflows across frontend and backend. Worked on automated email notifications, weekly roundup emails and SMS workflows using AWS SES/SNS.

Curriculum Developer · Mimo · Contract

Nov 2021 - Jun 2022

Created interactive JavaScript, React, HTML and web-accessibility curriculum (explanations, code examples, projects and coding challenges), taking each piece through technical testing, peer feedback and revision to publication.

Web Developer · Asylos · Freelance, recurring client

2020 - 2023

Maintained and extended multiple web properties, progressing from WordPress maintenance into participant-management, access-control and training workflows. Built multi-step feedback and reporting automation connecting web forms, Zapier, Google Workspace and communication tools.

Front-End Developer · Ossix Technologies · Contract

Jun - Sep 2020

Built React, Redux and TypeScript features for 2U Money banking applications, including user management, customer account views, virtual and credit-card interfaces, role-dependent workflows, approval/rejection, transactions and localization, delivered through GitLab merge requests and code review.

Web Development Teaching Assistant · Ironhack

2019 - 2020

Supported cohorts of 15 to 29 students through intensive 9-week MERN bootcamps with one-on-one mentoring, debugging support and project feedback.

Lead Web Development Instructor · BSSA Coding Bootcamp

2018

Led a 16-student cohort through lectures, live coding and practical exercises, and mentored students through their capstone projects.

04 TECHNICAL SKILLS

FRONTEND	React · Next.js · TypeScript · JavaScript · Redux · HTML/CSS
MOBILE	React Native · Expo · EAS · TestFlight / App Store Connect · Google Play
BACKEND	Node.js · Express · REST APIs · GraphQL · Authentication (Cognito, 2FA/OTP)
CLOUD & DATA	AWS Cognito · AppSync · DynamoDB · S3 · Lambda · SES/SNS · MongoDB
COMMERCE & CMS	Shopify · Liquid · Headless e-commerce · Contentful · Storyblok · Klaviyo
DELIVERY	Git · GitHub · GitLab · Vercel · Render · Netlify · Zapier
PRACTICES	Frontend architecture · API integration · Mobile release management · Code review · Technical mentoring

05 EDUCATION

BSc (Hons) Computer Science

2012

Oxford Brookes University
