

# Lloyd Chambrier

## SENIOR FULL-STACK ENGINEER

React • React Native • TypeScript • Node.js • AWS

Amsterdam, Netherlands | +31 6 85 37 68 28 | lloydchambrier@gmail.com | github.com/LloydC

### PROFILE

Senior Full-Stack Engineer with 8+ years of experience across software development and technical instruction, building and shipping production web and mobile applications. Specialized in JavaScript, React, React Native, Node.js and AWS, with hands-on ownership spanning frontend architecture, backend integrations, cloud services, release workflows and product delivery. Experienced in e-commerce, marketplace and SaaS-style products, from early implementation through production launch and ongoing iteration.

### EXPERIENCE

#### Mobile / Full-Stack Developer — Resellify

2024 – Apr 2026

*Freelance*

- Built Resellify's new cross-platform mobile application from the ground up with React Native and Expo, taking substantial ownership of application architecture and implementation through production release.
- Developed core product flows including 2FA/OTP authentication, user profiles and settings, item management, listings and resale workflows, integrating the app with AWS-backed APIs and data services.
- Integrated application functionality with AWS Cognito, AppSync/GraphQL, DynamoDB, S3 and Lambda; collaborating with the engineer responsible for the initial AWS environment.
- Owned significant parts of the mobile release lifecycle across EAS, TestFlight/App Store Connect and Google Play, resolving review feedback, build issues and platform-specific production problems.
- Collaborated with developers, product stakeholders and UX designer through beta testing, production releases and ongoing iteration; earlier rebuilt functionality around Resellify's existing embeddable React resale widget.

**Tech:** React Native • Expo • TypeScript • AWS Cognito • AppSync/GraphQL • DynamoDB • S3 • Lambda • EAS

#### Full-Stack E-commerce Developer — QDivision

2024

*Freelance*

- Developed a reusable headless e-commerce framework using Next.js, React, Shopify APIs and Storyblok, including customer authentication, product/collection retrieval, cart management and checkout-related flows.
- Worked across multiple client projects, implementing and maintaining Shopify storefront functionality and integrations across greenfield and existing codebases.
- Contributed across implementation, debugging, testing, refactoring and deployment while adapting to different client requirements and architectures.

**Tech:** Next.js • React • Shopify APIs • Storyblok • Liquid • TypeScript

#### Lead Web Development Instructor — Ironhack

Jul 2022 – Apr 2025

- Led 8 full-time and part-time web development bootcamp cohorts, teaching groups of 6–29 students (typically 15–20) and owning the pace, structure and technical delivery of the learning experience.
- Delivered a full-stack MERN curriculum through lectures and live coding, covering JavaScript, React, Node.js, Express, MongoDB, authentication, REST APIs, Git/GitHub and deployment.
- Mentored students through individual and group projects, monitored technical progress, coordinated with Teaching Assistants and Program Managers, and provided end-of-course technical assessments.
- Maintained public GitHub examples and adapted delivery as the ecosystem evolved, including Vite and Render/Netlify; automated Slack notifications for processed Zoom recordings with Zapier.

#### Front-End Developer — AskPhill

Jul 2021 – Jul 2022

*Amsterdam, Netherlands*

- Developed and maintained 6 e-commerce storefronts for consumer brands using Next.js, Shopify, Contentful and Liquid across headless and Shopify-based architectures.
- Built commerce functionality including product reviews, back-in-stock notifications, pricing and promotional components, integrating services such as Klaviyo and Stamped.
- Restructured Contentful data fetching to address API rate limits by splitting large queries into batched requests and recombining the resulting data in the application.
- Implemented and troubleshot production integrations including Google Tag Manager and Shopify APIs while contributing to Vercel deployment and production delivery.

**Tech:** Next.js • React • Shopify • Liquid • Contentful • Vercel • Klaviyo • Google Tag Manager

## SELECTED EARLIER EXPERIENCE

### Full-Stack Developer — Social Wire

Apr – May 2023

*Freelance*

- Extended an existing community platform with threaded forum replies, user mentions, role-based tagging, profile/account functionality and notification workflows across frontend and backend systems.
- Worked on automated communications using AWS SES/SNS, including email notifications, weekly roundup emails and SMS workflows.

### Curriculum Developer — Mimo

Nov 2021 – Jun 2022

*Contract*

- Developed interactive JavaScript, React, HTML and web-accessibility curriculum, creating technical explanations, code examples, projects and coding challenges.
- Took learning material through drafting, technical testing, peer feedback and revision before preparing it for publication through Mimo's course-building workflow.

### Web Developer — Asylos

2020 – 2023

*Freelance / recurring client*

- Maintained and extended multiple web properties, progressing from WordPress maintenance into participant-management, access-control and training workflows.
- Built multi-step feedback/reporting automation integrating web forms, Zapier, Google Workspace and communication tools for data collection, follow-ups and generated reports.

### Front-End Developer — Ossix Technologies

Jun – Sep 2020

*Contract*

- Developed React/Redux/TypeScript frontend functionality for 2U Money banking applications, including user management, customer account views, virtual/credit-card interfaces and role-dependent workflows.
- Implemented approval/rejection, transaction and localization functionality while working through GitLab merge requests, code review, testing and bug fixing.

### Web Development Teaching Assistant — Ironhack

2019 – 2020

- Supported cohorts of 15–29 students through intensive 9-week MERN bootcamps, providing one-on-one mentoring, debugging support and assignment/project feedback across frontend and backend development.

### Lead Web Development Instructor — BSSA Coding Bootcamp

2018

- Led a 16-student cohort through lectures, live coding and practical exercises; reviewed assignments and mentored students through capstone projects during the final six weeks.

## TECHNICAL SKILLS

|              |                                                                                 |
|--------------|---------------------------------------------------------------------------------|
| Frontend     | React • Next.js • React Native • Expo • TypeScript • JavaScript • HTML/CSS      |
| Backend      | Node.js • Express • REST APIs • GraphQL • Authentication                        |
| Cloud & Data | AWS Cognito • AppSync • DynamoDB • S3 • Lambda • MongoDB • Contentful           |
| Commerce     | Shopify • Liquid • Headless E-commerce • Marketplace Products                   |
| Engineering  | Frontend Architecture • API Integration • Git • EAS • Vercel • Render • Netlify |
